

Cloud Governance Guidelines

Purpose: Provide governance controls for secure, compliant, and cost-effective cloud operations.

Scope: Azure, AWS, and Google Cloud Platform.

Governance Principles:

- Security First
- Least Privilege Access
- Cost Optimization
- Compliance

Resource Tagging:

Environment, Application, CostCenter, Owner, BusinessUnit.

Naming Convention Example:

rg-aigov-prod-eastus

Security Controls:

- Azure AD
- MFA
- Conditional Access
- Network Security Groups
- Private Endpoints
- Azure Monitor

Policy Compliance Examples:

- Allowed Regions Only
- Mandatory Tags
- Encryption at Rest
- HTTPS Only

Cost Management:

Monthly reviews and budget alerts at 50%, 80%, and 100%.

Governance Review:

Quarterly review by Cloud Center of Excellence (CCoE).
